

## EuroView® Lift and Slide Door

The EuroView Lift and Slide Door is a newly developed, fully self-contained sliding door system that makes freedom the norm. 100% compatible with all commercial operating hardware systems the EuroView Lift and Slide Door is equally at home in your home or in a multi-story structure. In terms of design, opening options, installation options and ease of use there are virtually no limits. Since this sliding door is part of the EuroView system, the facade of your property will have a coordinated and harmonious appearance.

All EuroView Lift and Slide Doors come standard with high quality hardware. The smooth operating handles can be color matched to the vinyl or they are available in a brushed nickel satin finish and polished brass. By turning the handle a full 180 degrees, the operating panel unlatches and can easily be rolled along its track on stainless steel rollers to provide ventilation or egress.

## EuroView Lift and Slide Door

## Euroview Performance Matrix

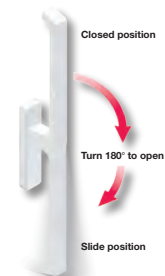

Product	Limitations			Performance	
	Door Type	Sash Width	Sash Height	Frame Size	DP Rating
